

NAKKA SAI VENKATA DEEPTHI

Software Development Apprentice | Java | Spring Boot | React.js

Guntur, Andhra Pradesh | +91 90144 45419 | venkatasaideepthi3@gmail.com | [Linkedin](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

B.Tech Computer Science (IoT) student (2022–2026) with hands-on experience delivering full-stack web applications using Java, Spring Boot, React.js, MySQL, and RESTful APIs through internship and project work. Completed a Java Full Stack internship focused on backend API development, performance tuning, database query optimization, and structured API testing using Postman, Git, and Docker-based CI/CD workflows. Strong foundation in OOP, Data Structures and Algorithms, DBMS, Computer Networks, and SDLC, applied in Agile/Scrum projects. Seeking a Software Development Apprentice role to build scalable, secure, high-performance systems using Java, JavaScript/TypeScript, React, REST APIs, and relational databases.

Education

B.Tech – Computer Science & Engineering (IoT) | CGPA: 8.27 / 10

R.V.R. & J.C. College of Engineering, Guntur | 2022 – 2026

Relevant Coursework: DSA, OOP, Operating Systems, DBMS, Computer Networks, Software Engineering, System Design, Software Development Lifecycle (SDLC).

Class X – 98% | Vivekananda Vidya Vihar High School, Repalle, Guntur

Class XII – 85% | Sri Chaithanya Junior College, Repalle, Guntur

Technical Skills

Languages: Java, JavaScript, TypeScript (basic), Python, SQL

Backend: Spring Boot, Spring Framework, RESTful APIs, microservices (basics), Node.js, Express.js, API integrations

Frontend: React.js, HTML5, CSS3, JavaScript, responsive UI development

Databases: MySQL, MongoDB, relational design, SQL/NoSQL queries, indexing & optimization

Cloud & DevOps: Docker, CI/CD pipelines (exposure), Linux (CLI basics)

Tools & Practices: Git, GitHub (branching, PRs, code reviews), Maven, Postman, Agile/Scrum, API testing & debugging, version control workflows

Engineering: Data Structures & Algorithms, OOP, Design Patterns (MVC, Repository), SDLC, software testing, debugging, microservices basics.

Projects

Online Code Execution Platform *React.js* | *Node.js* | *Judge0 API* | *JavaScript*

- Built a full-stack, browser-based platform enabling execution in 11+ programming languages using a React.js frontend, Node.js backend, and Judge0 API for sandboxed compilation and runtime.
- Improved responsiveness and usability by optimizing frontend–backend request flows, reducing redundant API calls, and designing modular React components for code editing, I/O handling, error reporting, and result visualization.

Clean Street – Civic Issue Tracking Platform *React.js* | *Spring Boot* | *MySQL* | *REST APIs*

- Delivered a full-stack civic issue tracking application in a 4-member team by developing Spring Boot REST APIs, MySQL schemas, and role-based access control for citizen and admin workflows.
- Improved data reliability, query performance, and user support by normalizing schemas, optimizing SQL queries and indexes, and integrating an AI-driven chatbot with backend REST API workflows for issue triage and FAQs.

QuickLink – Scalable URL Shortener *Node.js* | *Express.js* | *MongoDB* | *REST APIs*

- Developed RESTful APIs for URL creation, redirection, and click tracking using Node.js, Express.js, and MongoDB to support reliable generation and management of short links.
 - Increased scalability and maintainability by designing MongoDB data models and service layers following clean architecture principles, enabling future analytics and rate limiting.
-

Experience

Java Full Stack Developer Intern — Miracle Software Systems, Vizianagaram | *May 2025 – Jun 2025*

- Improved average API response time by 15% by developing and maintaining Spring Boot REST APIs using Controller–Service–Repository patterns and backend performance optimizations.
 - Reduced MySQL query latency by ~25% by tuning SQL queries, adding indexes on high-traffic tables, and refining database access patterns for production-style workloads.
 - Raised release quality and collaboration effectiveness by executing structured API testing, defect analysis, and regression checks using Postman within Agile/Scrum sprints, and by using Git/GitHub for branching, pull requests, code reviews, and Docker-based CI/CD-aligned SDLC activities.
-

Certifications & Achievements

- Google Cloud Gen AI Academy (APAC) – AI Agents using ADK
- Java Full Stack – Wipro TalentNext; Infosys Springboard
- Databases for Developers – Oracle Dev Gym.
- SQL (Basic) & Java Silver Badge – HackerRank.
- 250+ DSA problems on LeetCode, HackerRank & CodeChef; Azure and Deloitte/Forage virtual experience programs.
